- 2M+ packages secured
- 300+ happy clients
- 50+ team members

Products

Wooden packing

Wooden boxes, Heavy duty crates, Export packing boxes, Wooden Pallets

Wooden packing provides sturdy final protection to your products as well as makes its handling easy while loading, unloading, movement & storage.

Lashing & Choking

Container Stuffing, Vessels packing

Suitable for -Securing cargo inside containers and transport vehicles to prevent movement, shifting, and damage during road, rail, and sea transit.

VCI Packing

VCI Bags & Desiccants

VCI packaging has revolutionized the protection of metal goods by releasing corrosion-inhibiting vapors that form an invisible protective layer on metal surfaces. This prevents rust and corrosion effectively, both during long-term storage and transportation.

Products

Shrink packing

In Shrink packaging product is enclosed in a plastic film that contracts uniformly around it when heat is applied. This creates a secure, form-fitting cover and is commonly used for both protection and bundling during storage and transportation.

Vacuum packing (Aluminum Foil bag)

Vacuum packing with aluminium foil bags is a packaging method in which air is completely removed from the package before sealing. This creates a tight, compact pack that protects products from moisture, oxidation, contamination, and internal movement.

Essential primary packing material

Air Bubble

Stretch Film

Foam

Dunnage Bags
